

Hi, I'm Sarah M. Moore.
I am a Full-Stack
Web Developer and
Commercial Photographer
blending over a decade of
corporate database logic
with high-end visual asset
creation.

[View Portfolio](#)

Corporate Precision

I spent over a decade mastering corporate financial infrastructure, account workflows, and database modeling. This phase instilled a rigorous eye for detail, procedural logic, and structural precision. I don't just design interfaces; I understand complex business operations, tight deadlines, and backend data flows from the inside out.

Creative Awakening

In 2019, I transitioned my lifestyle to full-time U.S. travel, transforming my analytical mindset into a visual asset engine. I logged thousands of miles behind the lens, capturing leading-line landscape narratives and complex macro floral photography. This deep immersion taught me how to curate, edit, and manage vast digital asset libraries for production readiness.

Technical Execution

Today, I combine my analytical roots with my creative drive by pursuing Web Development and Media Creation at Arizona State University, maintaining a 3.98 GPA on the Dean's List. Specializing in full-stack architecture, I merge advanced toolsets like the Adobe Creative Suite with modern code deployment pipelines in Java, HTML, and CSS to build highly functional, visually striking digital products.

The Intersection of Systemic Logic and Visual Storytelling

My professional path is built on a rare combination of structural precision and creative execution. For over a decade, I operated within the rigorous frameworks of corporate financial systems—mastering database modeling, accounts infrastructure, and complex procedural operations. This background instilled in me an analytical mindset, a deep respect for systemic architecture, and an eye for data integrity.

In 2019, I stepped away from the desk to embrace full-time travel across the United States. Living on the road became a profound creative catalyst. Pushing me behind the camera lens, I logged thousands of hours capturing raw landscape narratives and detailed floral macro work, developing an extensive asset library of digital photography that I continue to edit, curate, and deploy across my design work.

To bridge these technical and visual chapters, I immersed myself in Graphic Information Technology at Arizona State University, maintaining a 3.98 GPA and consistent placement on the Dean’s List. I am also a candidate for the Family First Scholarship. By pairing my corporate analytical foundation with an academic specialization in full-stack web development, Java technologies, human systems engineering, and commercial photography, I build robust, responsive digital environments where backend engineering meets compelling, user-centered design.

Visual Assets Portfolio

Landscape Narratives

Macro Floral Study

Craftsman Tool Assets

Cub Cadet Commercial

High-utility visual assets—meticulously curated, edited, and optimized for modern web deployment.

Systems & Database Logic

Database Management Systems (IFT 300), Java Technologies, Data Storage & Retrieval, Financial Accounts Infrastructure.

Visual Asset Production

Commercial Photography (GIT 384), Digital Illustration, Asset Curation & Editing, Adobe Creative Suite Mastery.

Strategic Media & UI/UX

Human Systems Engineering (UX Design Logic), The Digital Audience, Web Content Programming (GIT 337), Metrics Strategy.

PROFESSIONAL EXPERIENCE & EDUCATION

Corporate Operations & Financial Systems (2009 – 2019)

- Mastered database modeling, accounts infrastructure, and complex procedural operations.
- Managed structural data integrity, high-volume financial pipelines, and internal business logic.
- Developed an analytical mindset and a rigorous eye for detail under tight operational deadlines.

Creative Media Asset Curation (2019 – Present)

- Clocked thousands of hours behind the camera lens capturing raw landscape and macro narratives.
- Built and managed an extensive visual library of custom, production-ready digital assets.
- Specialized in commercial product photography, focusing on precision lighting and item staging.

Arizona State University (B.S. Candidate)

- Major: Graphic Information Technology (Full-Stack Web Development Focus)
- Academic Standing: 3.98 Cumulative GPA | Continuous Dean’s List Honor Roll
- Honors: Family First Scholarship Candidate
- Core Tracks: Database Management Systems, Java Technologies, Human Systems Engineering (UX), Commercial Photography.
